

−Data with KEGG pathway−
−Rendered by Pathview−

KEGG diagram legend

Edge Types

compound

hidden compound

activation

inhibition

expression

repression

indirect effect

state change

binding/association

dissociation

phosphorylation +p

dephosphorylation −p

glycosylation +g

ubiquitination +u

methylation +m

others/unknown ?

Node Types

gene (protein/enzyme)

group (complex)

compound (metabolite/glycan)

map (pathway) Pathway name
